

News Release:

April, 2012

Albion, MI

Velocity Mfg. an Albion, MI manufacturer since 2004 is announcing expanded capabilities in several areas of its operations. Since 2004, Velocity Mfg. has been providing repair and replacement items for various processing equipment. In 2006, their capabilities increased with production equipment used for producing numerous components required within industrial casters.

Today, Velocity Mfg. has increased its capabilities to include greater exposure to MRO (maintenance and repair operations) parts and assemblies as well as new components and sub-assemblies built to customer's specifications. Production part capabilities have also increased to include more operations for fabricating, tube bending, welded tube assemblies and other production of small turned parts.

Additionally, Velocity Mfg. has established collaboration relationships with strategic partners and is now capable of producing (design and build) complete custom machinery used in food and beverage processing and packaging.

As a certified minority-owned business enterprise, registered with the federal SBA and Central Contractor Registration, Velocity Mfg. is leveraging its manufacturing expertise by offering manufacturing services supply chain management for both buyers and suppliers.

The increased capabilities further diversify Velocity Mfg's. customer base and potential markets, positioning them for increased growth and stability.
